4. Sales Forecasts
5. In-Depth Feature Review

Executive Summary

The 90-day forecast anticipates 32 sales – averaging in the **low teens** per month – which **falls short of** the monthly budgeted target in the mid teens.

Previous focus:

- Paid traffic focus: audit high-volume/low-duration traffic to identify underperforming sources and determine if the issue is targeting mismatch or potential audience oversaturation.

What has changed:

- **Traffic & engagement**: Display ads hit a new peak and email traffic rebounded; average sessions per user rose, signaling **higher stickiness** despite a minor **dip** in overall **engagement rates**.
- **Lead source trends**: drive by signs and internet leads are trending upward, while scheduled tour leads dropped to a 12-month low in March.
- **Appointment volume**: Internet appointments moderated slightly from the February peak.

What hasn't changed:

- **Total lead generation** has plateaued at mid-to-lower levels since January with no material movement.

Suggested discussion points:

- **Grow traffic** to bridge the volume gaps.
- Address the the below-average **web-to-lead conversion** at the **Harris** community to recover sales momentum lost in February.

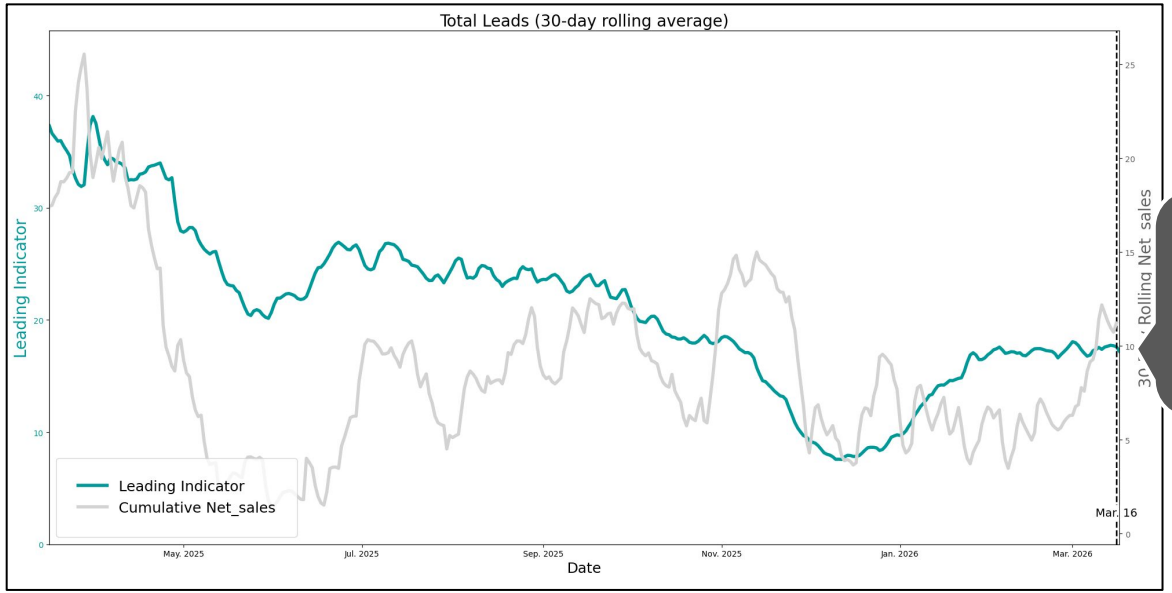
CRM Based Indicators

Total Lead Volume

Lead generation plateaus at mid-to-lower levels since Jan

Total Leads

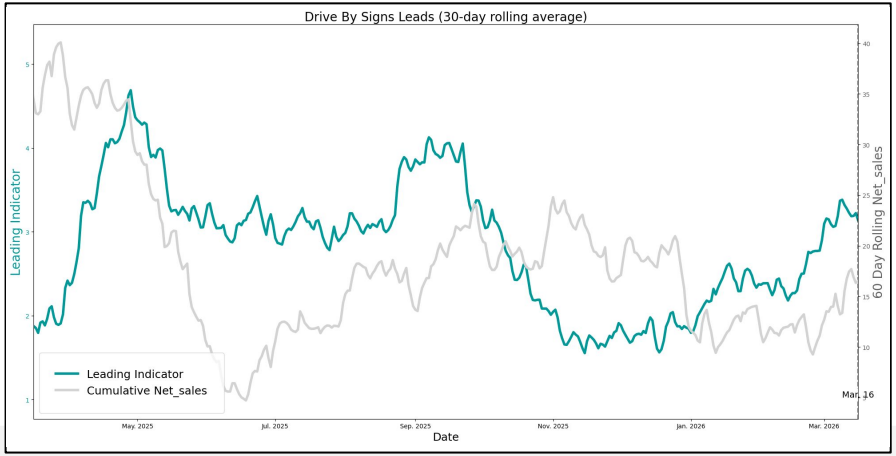


Total lead volume has remained unchanged since the beginning of the year and shows a flat performance trend, with volume holding at the mid-to-lower levels.

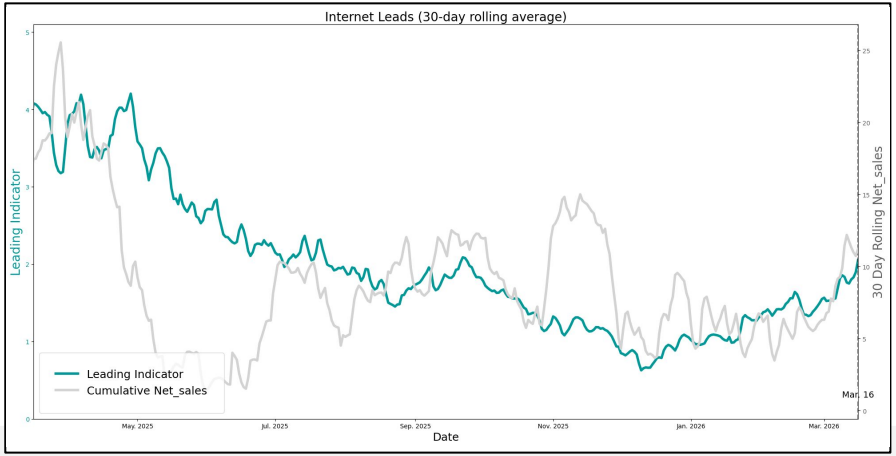
Lead Source Highlight (1/2)

Drive By and internet leads show a steady MoM increase

Drive By Signs Leads



Internet Leads

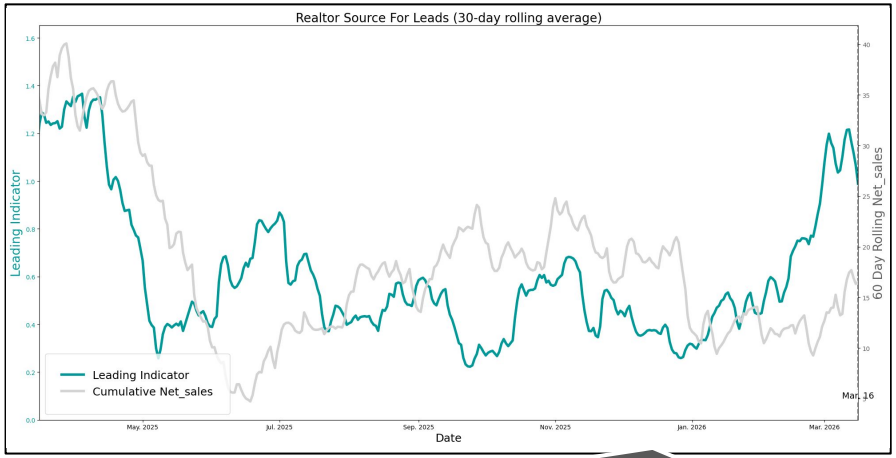


Both drive-by signs and internet leads have experienced steady growth over the past month. Currently, drive-by signs are being generated at higher volume levels, while internet leads remain in the mid-to-lower tier.

Lead Source Highlight (2/2)

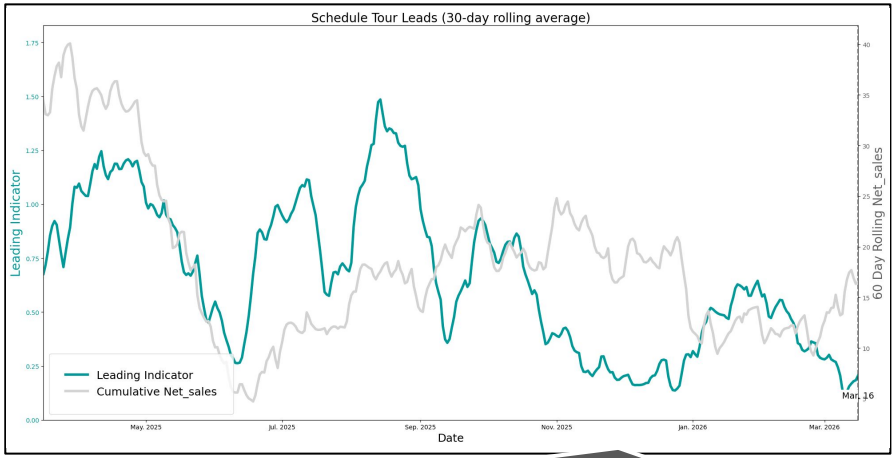
Realtor leads hold high as sched. tour leads hits yearly lows

Realtor Source For Leads



Realtor-sourced leads have maintained a high volume throughout the past month.

Schedule Tour Leads



Conversely, leads generated from scheduled tours have declined in March and reached their lowest levels of the past 12 months.

Community Pulse (February)

Low conversion rates at Harris lead to sales shortfall

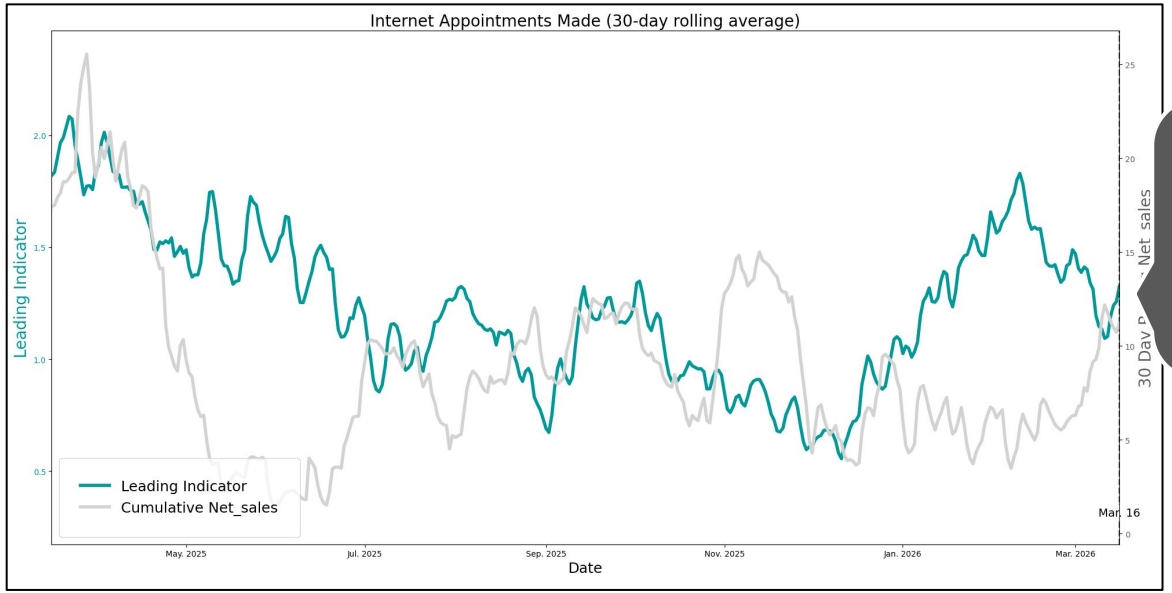
Harris	3.0	1.0	-3.0	-4.0	-0.3	-2.0
Reserve at Victoria	1.0	1.0	0.0	-2.0	0.8	-0.7

While the Harris community is receiving near-target traffic, its conversion rate from web traffic to total leads is below the divisional average. This gap resulted in the community missing 2 sales in February.

Internet Appointments Made

Monthly vol holds high despite a drop from the Feb. peak

Internet Appointments Made



The total number of internet appointments made has decreased from the peak in February.

However, the current volume remains at a higher level when compared to the past 12 months.
